490,599 people	60.9% of fully
	vaccinated 65+ pop.

SARS-CoV-2 Variants of Concern

In the 4 weeks ending 1/22/2022, the following proportions of variants of concern were identified in <u>South Carolina</u>: Delta (B.1.617.2, AY.*)
 2.9%, Omicron (B.1.1.529, BA.*) 96.7%

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

Starting 11/1/21, several states shifted to the use of report date; this change may result in fluctuations of weekly values and/or week-on-week changes.

Due to technical issues, South Carolina's test positivity and test volume for the last week may be incomplete.

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to https://www.cdc.gov/dcs/ContactLis/Form.

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US

that day have been excluded. Data are through 2/17/2022; previous week is from 2/4 to 2/10.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 2/15/2022; previous week is from 2/2 to 2/8. Test volume through 2/11/2022; previous week is from 1/29 to 2/4. Due to technical issues, South Carolina's test positivity and test olume for the last week may be incomplete

Admissions: Unified Hospitals Dataset in HHS Protect. Data are through 2/16, previous week is from 2/3 to 2/9.

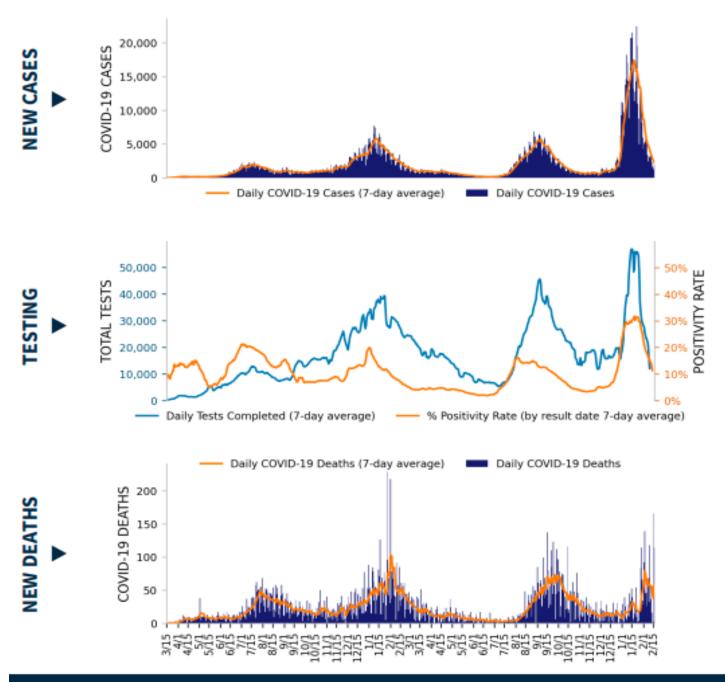

Shortages: Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 2/16/2022 for supplies.

Vaccinations: 305 COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:39 EST on 02/18/2022. Deta last updated 06:00 EST on 02/18/2022. People initiating vaccination include those who have received the first dose of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range.

Indicates absolute change in percentage points.

* Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

STATE PROFILE REPORT | 02.18.2022

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes. All three trends share the same horizontal axis shown on the bottom figure.

Cases and Deaths: State values are aggregated data provided by the states to the CDC. Historical cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data are through 2/17/2022.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Test positivity through 2/15/2022. Test volume through 2/11/2022. Due to technical issues, South Carolina's test positivity and test volume for the last week may be incomplete.

METHODS: Details available on last two pages of report.

DATA SOURCES

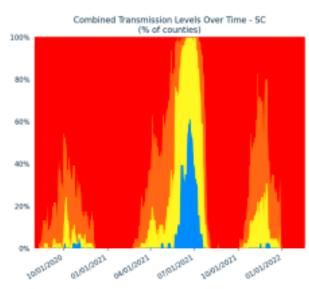

County reporting completeness for South Carolina is 93.1%.

Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:39 EST on 02/18/2022. Data last updated 06:00 EST on 02/18/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine.

STATE PROFILE REPORT | 02.18.2022 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (0)	0 (0)	46 (0)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (0)	18 (0)

All Red Counties: Richland, Greenville, Horry, Lexington, York, Charleston, Spartanburg, Berkeley, Florence, Anderson, Beaufort, Dorchester, Aiken, Pickens, Lancaster, Kershaw, Sumter, Greenwood, Oconee, Orangeburg, Darlington, Cherokee, Laurens, Chester, Chesterfield, Georgetown, Clarendon, Newberry, Union, Marlboro, Colleton, Williamsburg, Fairfield, Dillon, Abbeville, Barnwell, Edgefield, Marion, Jasper, Hampton, Saluda, Bamberg, Calhoun, Lee, McCormick, Allendale

All Red CBSAs: Columbia, Greenville-Anderson, Charleston-North Charleston, Charlotte-Concord-Gastonia, Myrtle Beach-Conway-North Myrtle Beach, Spartanburg, Florence, Hilton Head Island-Bluffton, Augusta-Richmond County, Sumter, Greenwood, Seneca, Orangeburg, Gaffney, Georgetown, Newberry, Union, Bennettsville

DATA SOURCES

Maps and figures reflect 7-day average of data from 2/11-2/17 (cases), 2/9-2/15 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data are through 2/17/2022.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data are through 2/15/2022. Due to technical issues, South Carolina's test positivity and test volume for the last week may be incomplete.

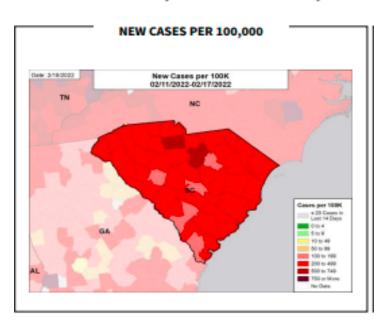

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are

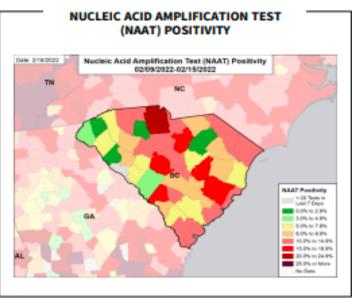

computed based on current data. See

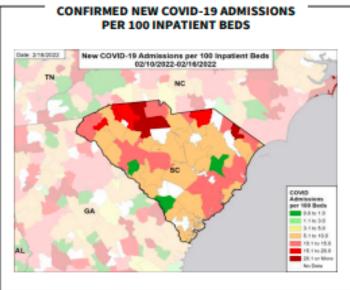

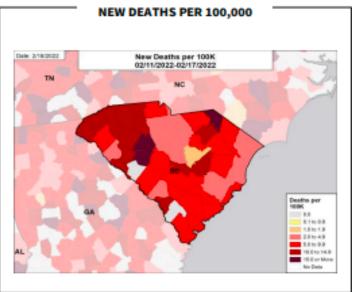

STATE PROFILE REPORT | 02.18.2022

CASE RATES, NAAT POSITIVITY, HOSPITAL ADMISSIONS, AND DEATH RATES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled overtime, resulting in week-to-week changes.

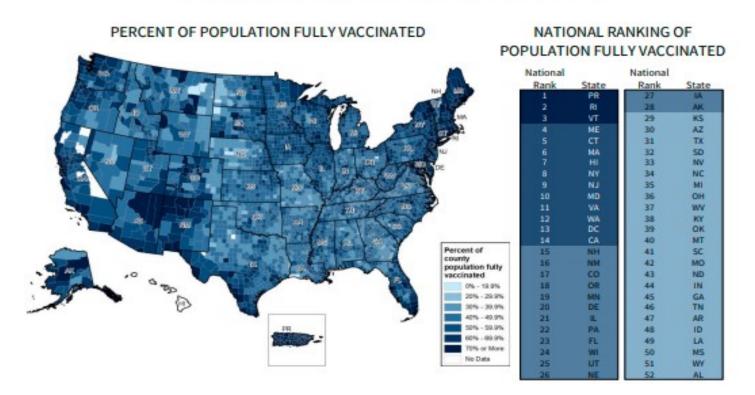

Cases and Deaths: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data are through 2/17/2022.
Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data are

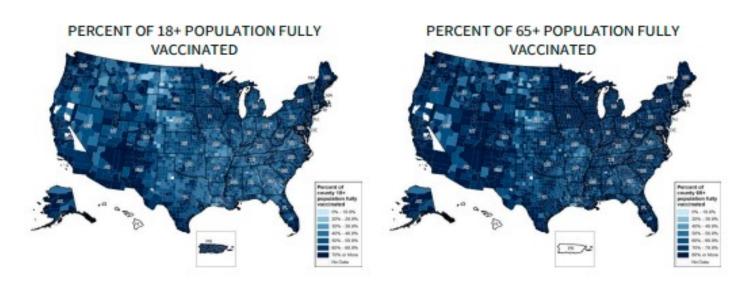

through 2/15/2022. Due to technical issues, South Carolina's test positivity and test volume for the last week may be incomplete.

Hospitalizations: Unified Hospitals Dataset in HHS Protect. Totals include only confirmed COVID-19 admissions. HSA indicates Hospital Service Area. Hospitals are assigned to HSA based on zip code where known. In some areas, reports are aggregates of multiple facilities that cross HSA boundaries; in these cases, values are assigned based on the zip code for the aggregate. Data are through

PEOPLE RECEIVED BOOSTER DOSE	92,589,369 43.1% of fully vaccinated total pop.	PEOPLE 65+ RECEIVED BOOSTER DOSE	31,958,272 65.8% of fully vaccinated 65+ pop.

DAILY NATIONAL COUNT OF VACCINE DOSES ADMINISTERED BY DATE OF ADMINISTRATION

DATA SOURCES

Vaccinations: GDE COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:39 EST on 02/18/2022. Data last updated 06:00 EST on 02/18/2022. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. The count of people who received a booster dose includes anyone who is fully vaccinated and has received another dose of COVID-19 vaccine since August 13, 2021. This includes people who received booster doses and people who received additional doses. Due to delays in reporting, data on doses administered in recent days (as reflected by lighter purple coloring in the Daily National Count figure) may be an underestimate of the actual value.

METHODS: Details available on last two pages of report.

NEW CASES PER 100,000 IN THE WEEK:

ONE MONTH BEFORE

TWO MONTHS BEFORE

THREE MONTHS BEFORE

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. Some states may report deaths by date of death, instead of date of report, periodically backfilling historical data. This can cause values shown for the last week to be underestimated due to the delay in processing and reporting COVID-19 deaths. The week one month before is from 1/14 to 1/20; the week two months before is from 12/17 to 12/23; the week three months before is from 11/19 to 11/25.

METHODS: Details available on last two pages of report.

NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY IN THE WEEK:

ONE MONTH BEFORE

TWO MONTHS BEFORE

THREE MONTHS BEFORE

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data are through 2/15/2022. The week one month before is from 1/12 to 1/18; the week two months before is from 12/15 to 12/21; the week three months before is from 11/17 to 11/23. As of 8/31/2021, Washington has been experiencing technical issues. As a result, test positivity and test volume may be incomplete. Due to technical issues, the following states' test positivity and test volume for the last week may be incomplete: Alaska, California, New Hampshire, New Mexico, North Carolina, South Carolina, and Tennessee.

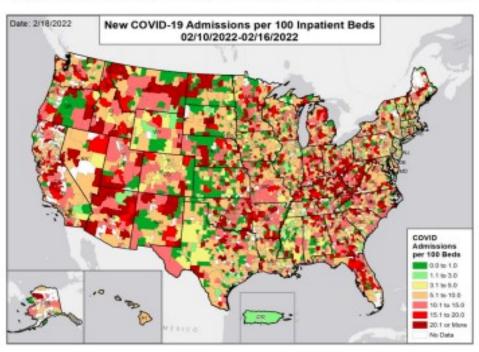

METHODS: Details available on last two pages of report.

National Picture: Hospital Admissions

CONFIRMED NEW COVID-19 ADMISSIONS PER 100 INPATIENT BEDS

NATIONAL RANKING OF CONFIRMED ADMISSIONS PER 100 BEDS

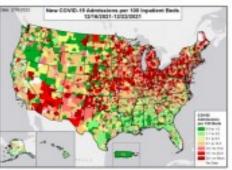

CONFIRMED NEW COVID-19 ADMISSIONS PER 100 INPATIENT BEDS IN THE WEEK:

ONE MONTH BEFORE

TWO MONTHS BEFORE

THREE MONTHS BEFORE

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Admissions: Unified Hospitals Dataset in HHS Protect through 2/16/2022. Totals include only confirmed COVID-19 admissions. Puerto Rico is shown at the territory level as HSAs are not defined. The week one month before is from 1/13 to 1/19; the week two months before is from 12/16 to 12/22; the week three months before is from 11/18 to 11/24. HSA indicates Hospital Service Area. Hospitals are assigned to HSA based on zip code where known. In some areas, reports are aggregates of multiple facilities that cross HSA boundaries; in these cases, values are assigned based on the zip code for the aggregate.

NEW DEATHS PER 100,000 IN THE WEEK:

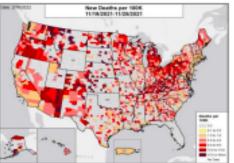

ONE MONTH BEFORE

TWO MONTHS BEFORE

THREE MONTHS BEFORE

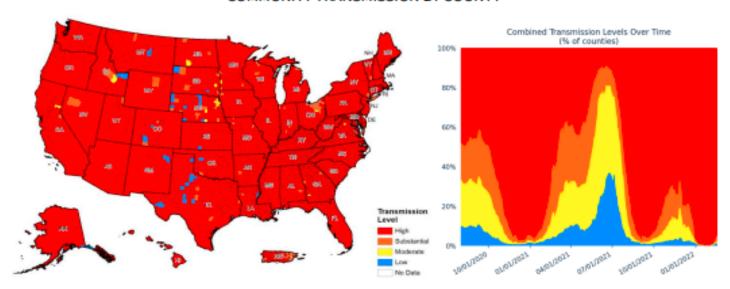

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Deaths: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. Some states may report deaths by date of death, instead of date of report, periodically backfilling historical data. This can cause values shown for the last week to be underestimated due to the delay in processing and reporting COVID-19 deaths. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. Puerto Rico is shown at the territory level as deaths are not reported at the municipio level. The week one month before is from 1/14 to 1/20; the week two months before is from 12/17 to 12/23; the week three months before is from 11/19 to 11/25.

DATA SOURCES

Maps and figures reflect 7-day average of data from 2/11-2/17 (cases), 2/9-2/15 (tests).

Note: Most recent days may have incomplete reporting.

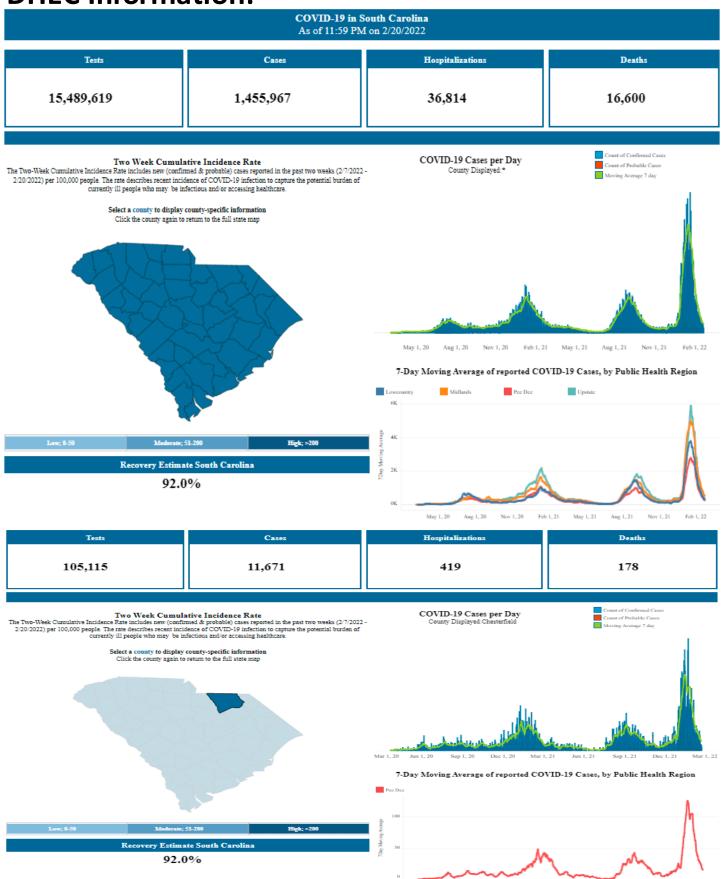

Cases: County-level data are from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state Data are through 2/17/2022.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data are through 2/15/2022. As of 8/31/2021, Washington has been experiencing technical issues. As a result, test positivity and test volume may be incomplete. Due to technical issues, the following states' test positivity and test volume for the last week may be incomplete: Alaska, California, New Hampshire, New Mexico, North Carolina, South Carolina, and Tennessee.

County Percentages: Based on a denominator of 3,220 county/county-equivalents, including states, the District of Columbia, and Puerto Rico municipios.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See CDC COVID Data Tracker.

SC Reproduction Number Estimate

Summary (estimates as of the 2022-02-14)

Table 1: Latest estimates (as of the 2022-02-14) of the number of confirmed cases by date of infection, the expected change in daily confirmed cases, the effective reproduction number, the growth rate, and the doubling time (when negative this corresponds to the halving time). The median and 90% credible interval is shown for each numeric estimate.

	Estimate
New confirmed cases by infection date	1677 (267 – 11109)
Expected change in daily cases	Likely decreasing
Effective reproduction no.	0.69 (0.37 - 1.2)
Rate of growth	-0.088 (-0.2 – 0.047)
Doubling/halving time (days)	-7.8 (153.5)

Confirmed cases, their estimated date of report, date of infection, and time-varying reproduction number estimates
